The kids guide to GPS- How it works and how its used. Engineering Adventures With The Global Positioning System

By Stephen M Dye

CreateSpace Independent Publishing Platform. Paperback.
Book Condition: New. This item is printed on demand.
Paperback. 34 pages. Dimensions: 8.0in. x 5.8in. x 0.2in. A childrens book aimed at the 4th to 9th Grade level that explores the many practical aspects and uses of GPS and how it all works. The book starts out with a practical explanation of how location finding works and then translates this to how a GPS satellite and receiver figures your location. The book then continues to show the child reader what goes on and goes in a GPS satellite. Next, the many different ways in which a GPS receiver can be used for such areas as farming, rescue, surveying, smart phones and many more are all explored. The childs imagination is challenged at the Imagination Station where they have to think of creative ideas for using GPS now andor in the future. The kids minds are also challenged to draw a satellite and include some of the parts they have learned. The book closes with a look at the childs future, asking them what they want to be, explaining how any interest in GPS could give them the possibility of being an engineer, software designer, pilot,...

Reviews

The best book i at any time read. I am quite late in start reading this one, but better then never. I realized this publication from my dad and i advised this book to understand.

-- **Raina Simonis**

Certainly, this is the finest work by any article writer. It really is full of wisdom and knowledge You will not sense monotony at at any time of your own time (that's what catalogs are for concerning should you ask me).
