Atlantic Publishers & Distributors (P) Ltd, 2008. Hardcover. Book Condition: New. Environmental biotechnology offers unique, efficient, eco-friendly and economically viable options for treatment of wastes in situ and conversion of hazardous toxic waste into relatively less harmful or harmless products. It involves applications of biotechnology to the management of environment and related socio-economic and development issues. The third volume of Handbook of Environmental Biotechnology deals with topics such as environmental biotechnology in chemical processing and allied industries, soil and landfill, novel methods of environmental biotechnical pollution control like vermiculture biotechnology and composting. This volume is divided into three sections. Section I deals with environmental biotechnology in chemical processing and allied industries. The key aspects of early detection of hazards, assessment of consequences of accidental release of effluents and evaluation of biotechnology at various stages of implementation have been taken up. Section II concentrates on transformation and enhancement of resource base, reduction of energy consumption, pollution abatement, enhancement of biomass production and conservation of non-renewable resources, generation of useful organic chemicals from bioconversion of biomass, etc. Section III discusses the novel methods of environmental biological pollution control such as the role of earthworms in improving soil fertility, and of plants in absorbing gaseous pollutants and aquatic weeds in absorbing pollutants. The text has been supplemented with diagrams, figures and tables. All the topics have been covered in a cogent and lucid style to help the reader grasp the information easily. Glossary and Index have been provided for quick reference. The book is a treatise on environmental biotechnology and an essential reading for all students, teachers, professionals, researchers and industrialists concerned with environmental science, microbiology and life sciences. It is also a valuable source of information for those preparing for or already associated with pollution prevention, chemical engineering, biochemical engineering, food processing...
